

VE PLN: Summer of Survival

This summer, Memorial Day through Labor Day, VSTE Place in Minecraft will hold its first Summer of Survival! Participants will be able to warp to survival mode for a completely different Minecraft experience. We will discover why our students beg for survival mode at school. It's challenging, but fun, and we will need each other to survive!

You may be able to earn points from your district with your VSTE certificate of participation. There will be a list of achievements to accomplish over the course of the summer. You can complete them in a few weeks or take the entire summer. The idea is to have fun while networking with other educators inside Minecraft.

Participants will need a Mojang account, a copy of Minecraft installed on their computer, and access to VSTE Place, the VSTE Minecraft server. Contact K4sons@gmail.com to get your Mojang Minecraft account whitelisted on our server.

Keep up with all the events at the [summer website](#) and the [Google Plus community](#).
