

Preparing Students for Today's Mobile Workforce

You're invited.

Mobile technology is transforming the way we learn and work. Join us for a hands-on event to see how you can use iPad to engage career and technical education students like never before.

Here's what you'll experience:

- Explore a range of apps and digital tools that bring Virginia career pathways programs to life in these areas:
 - Agriculture, food, and natural resources
 - Computer science
 - Health science
 - Hospitality and tourism
 - Human services
 - Science, technology, engineering, and mathematics
- Learn how the Everyone Can Code program supports Virginia's Computer Science Standards of Learning.
- Discover the skill sets and experiences employers expect from today's graduates.
- Investigate how carefully designed technology initiatives can prepare students for success in their careers.

You'll leave the event ready to create an innovative learning environment that equips students with the skills to be successful in the world they'll graduate into.

Who should attend

Career and technical education directors, guidance counselors, principals, assistant principals, community college deans, program directors, and workforce development coordinators
